

# CARD RECON

PCI DSS data discovery and remediation solutions trusted by QSAs

## FOR PCI DSS V4.0

Card Recon delivers targeted data discovery for simplified PCI DSS scoping and periodic scope revalidation, preconfigured with account number formats from all payment card major providers

## FOR SECURITY

Packaged with instant remediation options for rogue account data, Card Recon enables rapid response, minimizes exposure and ensures continuous compliance with PCI DSS

## FOR COMPLIANCE

Delivered with QSA-ready reporting as standard, Card Recon also provides targeted scope validation and data discovery for QSAs and PFIs, streamlining compliance assessments and data breach investigations

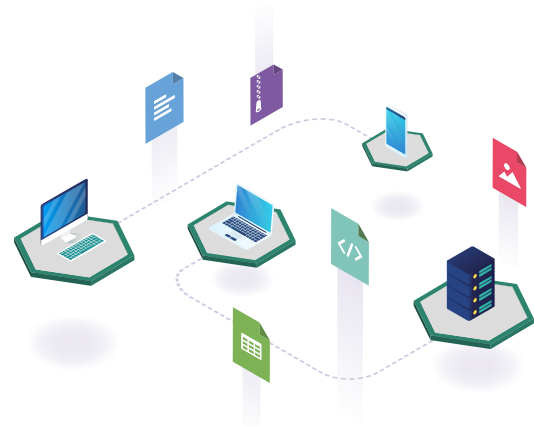

## FOR DISCOVERY

Card Recon offers fast, accurate discovery and remediation with minimal impact on performance, running without installation on most on-prem systems

**Card Recon** is the industry-leading data discovery solution specifically designed for PCI DSS v4.0. Supporting compliance with controls across the latest version of the standard, Card Recon delivers a simplified approach to scoping and data management for PCI DSS compliance.

Designed for convenience and ease-of-use, Card Recon provides **out-of-the-box PCI DSS data discovery** with instant remediation options that run with minimal impact on business systems.

**Card Recon** enables rapid discovery and remediation of cardholder data across user and endpoint devices

## CARD RECON DESKTOP

Lightweight PCI DSS data discovery for end-user devices

## CARD RECON SERVER

Out-of-the-box payment card data discovery trusted by QSAs

# Data Discovery Designed for PCI DSS

## Scoping made simple for payment card data security and compliance

### ▶ Accurate and powerful

Extensive discovery algorithms that deliver fast, accurate search results.

Powerful detection and validation filters findings minimize false positives.

### ▶ Predefined data types for PCI DSS compliance

Over 160 combinations of PAN structures from all major card brands including American Express, Diners Club, Discover, JCB, Mastercard, Visa, China Union Pay, Maestro, Laser and Troy, as well as private label cards.

### ▶ Comprehensive file support

Complete file scanning for all file types including OCR scanning, enabling data discovery in scanned documents and image files such as PDF, PNG, JPEG and TIFF. Compressed file types including Zip, TAR and GZip are also supported.

### ▶ Audio recognition technology

Discovery of data within audio files is enabled by advanced audio recognition technology that can identify data such as telephone DTMF tones encoded in audio files.

### ▶ Extensive scanning capabilities

Scan for structured and unstructured stores of data across local storage and local memory of supported desktops and servers, including Windows, MacOS, Linux, Unix, FreeBSD, Solaris, HP-UX, AIX and EBCDIC.

### ▶ In-built remediation

Instant remediation built in to manage unauthorized data stores, including masking, secure deletion, quarantine and encryption.

### ▶ Compliance-ready reporting

Offers comprehensive and easy-to-read compliance reports in a range of formats including PDF, HTML and CSV.

### ▶ Lightweight and low impact

Designed to perform deep-level scanning with minimal operational impact on system performance.

### ▶ No installation required

Designed to run independently, with no installation required, on all supported platforms. Portable storage media format provides rapid on-site sampling capability.

Features	DESKTOP	SERVER
<b>Desktop</b> (Windows, MacOS)	✓	✓
<b>Server</b> (Windows, Linux, FreeBSD, Solaris, HP-UX, AIX, EBCDIC)	✗	✓
<b>Target types</b> (Local storage, free space, shadow volumes, memory)	✓	✓
<b>File types</b> (Text files, all encodings, Office docs, compressed files)	✓	✓
<b>Audio and OCR support</b> (including DTMF)	✗	✓
<b>Other benefits</b> (Multi-Format reporting, Data remediation)	✓	✓
<b>Licensing</b>	Per desktop	Per target
